LOUVRE COMPACT SY WELD-IN UNDERWATER LED LIGHT

SY225 Louvre Compact models offers the latest concept in weld-in underwater light fixtures. Making use of a patented internal 'Louvre' lens system, this enables a flush-fit, weld-in flange for each and every underwater light location regardless of hull shape with no loss of light. A simplified installation procedure offers both time and cost savings during installation. The louvered LED array of each light is designed to account for all hull angles, eliminating the light lost in traditional long, angled tube flanges.
